QUICK-SHIFT LENSPOD SYSTEM

At the heart of the progressor's system is the split frame design, which consists of a podcarrier (main frame) and a lenspod (subframe including lens). Pick a different lenspod and push it onto the podcarrier until it snaps into place. You'll be ready to go with a different style in seconds. Additionally, all lenses that are universally exchangeable to the progressor c, progressor s and progressor pro pack can quickly and easily be swapped out thanks to the Quick-Shift Lenspod System, even while wearing gloves.

QUICK-SHIFT LENSPOD SYSTEM

At the heart of the provisor's system is the split frame design, which consists of a podcarrier (main frame) and a lenspod (subframe including lens). Pick a different lenspod and push it onto the podcarrier until it snaps into place. You'll be ready to go with a different style in seconds. Additionally, all lenses that are universally exchangeable to the provisor c, provisor s and provisor pro pack can quickly and easily be swapped out thanks to the Quick-Shift Lenspod System, even while wearing gloves.
