# 24 HOURS IN MIAMI

If you want to really see what a pair of sunglasses can do, take them where the sun is always shining: to the Sunshine City, Miami. Here, the average daily temperature is 84 degrees and the sun shines 360 days a year. We've come here to get away from the daily grind for just one day, to let our eyes wander and enjoy the moment.

## FISHER ISLAND, July 23, 9:15 a.m.

The sun winks out between two green palm trees swaying gently in the breeze. After just one minute of hearing the sounds of the waves, we're already feeling relaxed. The exclusive vibe is accentuated by the beauty of the natural surroundings, both elements flowing seamlessly together just like the ultra-sleek titanium and oversized lenses in the Fisher Island sunglasses from Silhouette's rimless shades collection. The two are made for each other.

## BISCAYNE BAY, July 23, 10:30 a.m.

Our sailboat glides through Miami South Channel, heading for the next harbor. Sunbeams glisten on the turquoise sea, leaving sparkling reflections. We feel a gusty breeze buffering our sails, but our ultralight Biscayne Bay sunglasses stay perfectly in place. Their shape echoes the streamlined design of our boat and the elegance of sailing on the ocean bays.

## BAYSIDE, July 23, 1:00 p.m.

We get swept up in the action on the shore at Bayside. Busy shops meet traditional fishermen and elegant yachts. There's something here for everyone, but it all blends into one harmonious scene, almost as perfectly as the combination of materials we use to create our Bayside sunglasses. The temples crafted are from Silhouette's patented high-tech material, SPX®+ and combined with photochromic lenses that darken in the intense afternoon sun.

## AVENTURA, July 23, 2:30 p.m.

After a shopping excursion in Aventura Mall, it's time for a break. We sprawl out on lounge chairs beside the hotel pool, where the sunlight performs a hypnotic dance with light and shadow on the surface of the water, which is the inspiration for our Aventura sunglasses. The transparent frames alternate between wide and narrow areas that form an exciting shape and a distinctive frame-in-frame look.

## MIDTOWN, July 23, 4:00 p.m.

With an ice cream cone in hand, we explore the exciting contrasts of Midtown: cool office towers, green palm trees and one-of-a-kind boutiques. Our Midtown sunglasses are also a shining example of contrast: light and dark; luxury and understated. The frames are larger than life, yet light as a feather, with a 70s retro look that remains timelessly contemporary.

## STAR ISLAND, July 23, 5:45 p.m.

We marvel at Star Island, the artificial oval-shaped island where celebrities go to play. It's a lifestyle that's exclusive, unique and anything but ordinary. And that's the style that our Star Island sunglasses from the Silhouette Rimless Shades collection perfectly symbolize, with special details like their intricate cutouts, curved double bridge and hand-colored lines on the lenses.

## BRICKELL, July 23, 7:15 p.m.

From a rooftop bar in the banking district, we watch the sun sinking behind the skyline. The evening sky forms a dazzling orange backdrop behind the dark outlines of the skyscrapers. The city is buzzing with life, just like our Brickell sunglasses from the Silhouette Sun Lite collection, whose masculine aviator shape give them a modern, casual look. The day is coming to an end. But the night is just starting to come alive.

## ULTRALIGHT SUNGLASSES

Silhouette creates eyewear that is among the lightest in the world, offering unparalleled comfort. The secret to our ultralight designs lies in the exceptional materials we use, including high-tech titanium made from a special alloy and SPX<sup>®+</sup>, a premium material specially developed by Silhouette.

## SELF-TINTING LENSES

Light conditions are constantly changing, even on sunny days. Silhouette lenses automatically adjust to the prevailing conditions. Our premium lenses feature an innovative technology that allows them to seamlessly adapt to the light conditions around you. The brighter the light, the more your lenses darken. When the clouds roll in, your lenses instantly lighten, so you can always see perfectly, whether you're driving, working or going for a run.

### STREAMLINE COLLECTION

Biscayne Bay 8727, 7110 White / Cool Grey

## SPX®+

SPX®+ is one of the most innovative eyewear materials in the world, and it was developed exclusively by Silhouette. It's flexible and heat-resistant, providing a perfectly comfortable fit all day, without ever losing its shape. Our innovative injection-molding process also allows us to use SPX®+ to create unlimited frame designs, from minimalistic to highly complex. SPX®+ performs exceptionally well in combination with other high-quality materials such as high-tech titanium.

# TITANIUM

Silhouette uses high-tech titanium, which combines unprecedented lightness with maximum flexibility and durability. The unique properties of titanium enable us to design eyewear without the need for screws. High-tech titanium is also hypoallergenic, making it an ideal choice for sensitive skin. We use a special alloy and exclusive techniques to ensure that even the finest parts are inseparably connected. This is how we deliver premium quality that is built to last.

**SILHOUETTE  
LIGHT  
MANAGEMENT®**

**ENHANCED VISION FOR  
A BRIGHTER MOOD**

Sunlight brings the world around us to life. It's also essential for our health. At Silhouette, we believe you should be able to enjoy all the sun has to offer, even when you're wearing sunglasses. That's why we developed Silhouette Light Management®. This innovative technology allows you to see more yellow light, so the world around you appears brighter, with sharper contrasts and more vivid colors. At the same time, Silhouette Light Management® lenses fully protect you from harsh light and glare, including total UV and blue light protection.
