

Thank you for choosing Eco!

164 MILLION
KILOGRAMS OF
CO₂ OFFSET

3.6 MILLION
TREES PLANTED
SO FAR

60 TONS OF
OCEAN WASTE
COLLECTED

From our frames to their packaging and displays, our aim is to always make sustainable material choices. But it doesn't stop there. We sponsor ocean and beach clean-ups worldwide with our partner Waste Free Oceans, and we also plant one tree for each frame purchased in collaboration with Trees for the Future. Our planting of trees has helped us reach a carbon negative status, and we're beyond proud of this achievement.

CARBON NEGATIVE EYEWEAR

Product families

Biobased

Our biobased frames are crafted using castor seed oil, making them lightweight, comfortable, and sustainable.

Recycled metal

Our metal frames are made using 95% recycled metal. That's serious savings of natural resources!

Bio acetate

Made from natural cotton and wood pulp with the same look and feel of normal acetate, but phthalate-free and biodegradable!

Ocean plastic

All Eco Ocean frames are created from recycled and ocean-based plastics.

Magnetic sun clip-ons

All our Biobased and Recycled metal frames have sun clip-ons with polarized lenses. Change your look in a snap!
